AUGUSTO SORIA

FULL-STACK DEVELOPER

linkedin.com/augustosoria github.com/augustosoria augustosoria@hotmail.es

ABOUT ME

I am responsible, communicative, patient, with a tolerance for frustration because I'm always looking for solutions or ideas, and without issues for teamwork.
I'm interested in the different parts of application development, and that's why I'm always open to learning new things.

EDUCATION

EducacionIT *02/2021-11/2021*
Full-Stack Development

Potrero Digital *07/2020-11/2020*
Front-End Development

Esc. Cap. Daniel Manzotti *2012 - 2017*
Electronic Technician

EXPERIENCE

kipBip *09/2024 - Present*

Application development focused on vehicle tracking features, route sequencing, and route optimization, integrating and adapting APIs based on business rules and configurable parameters. Experience in geospatial data visualization on maps, graphical map manipulation, data model design and documentation, ensuring service clarity and system maintainability. Worked on refactoring and modernizing legacy components, improving performance, reducing load times and resource consumption, and enhancing usability following Figma design guidelines. Implemented data synchronization and migration from Firebase to SQL Server, plus integrations with Twilio and NodeMailer for event-based notifications. Angular and Node.js as the main stack.

Plus+Ups *09/2022 - 06/2024*

Web and mobile application development with a full stack approach, working on data modeling, architecture, user experience, and legacy bug fixing. Experience using Angular, TypeScript, RxJS, Java, Spring, Hibernate, Liquibase, MySQL/PostgreSQL, files generation, and agile methodologies.

OTHER SKILLS

React, React Query, Zustand, Node, Express, MongoDB, Scrum, Google Cloud Platform, Kotlin. Knowledge in React Native, SASS, GraphQL, Docker, Mocha, Chai. Conversational English level.
