AUGUSTO SORIA

Full-Stack Developer | Front-End | Back-End

augustosoria@hotmail.es | linkedin.com/in/augusto-soria-a8b7251b7 | github.com/AugustoSoria | augustosoria.github.io
Argentina · Open to relocation to CABA, Buenos Aires.
Full resume: **augustosoria.github.io/#cv**

PROFESSIONAL PROFILE

Software developer with 4+ years of experience in web and mobile development, working across both frontend and backend. Main stack: Angular, TypeScript, Node.js, Express, Java, Spring Boot and Docker. Experienced in RESTful API design, systems integration, relational and NoSQL database modeling, and agile methodologies (Scrum). Proficient with Next.js, React, React Query and Zustand; familiar with Google Cloud Platform, AWS, React Native and GraphQL. Currently building AI agents with RAG and LLMs, and going deeper into Machine Learning and system design. Problem-solving mindset, committed to continuous learning, and comfortable working both in teams and autonomously.

PROFESSIONAL EXPERIENCE

kipBip / Planifi-k | Full-Stack Developer

September 2024 - Present · Full-time · Remote

AI support agent (RAG) · October 2026 - Present

Assistant that answers support questions about the ROADNET and RNA product documentation.

- Ingestion pipeline: PDF to Markdown conversion, chunking, sentence-transformers embeddings and per-source FAISS indexes.
- Multi-source FastAPI API with an LLM: conversation-aware query rewriting, cited sources and answers in Spanish, Portuguese or English.
- Angular chat, usage, token and feedback logging; deployed on AWS EC2 with Nginx and systemd.

Stack: Python, FastAPI, LangChain, FAISS, Hugging Face, Angular, AWS EC2, Nginx

pkConnector, integration platform (iPaaS) · February 2026 - Present

On-premise ELT engine to exchange data between SAP, ROADNET and RNA.

- Extended the transformation engine: nested array mapping, DataStore enrichment (lookups and composite keys) and Excel files as a data source processed through RabbitMQ.
- Built most of the Angular mapping wizard and the canonical model editor, optimizing loading and performance.
- Roles and permissions (RBAC), JWT expiration handling, and account activation and password reset flows.
- Customer data migrations from ROADNET to RNA; unit and integration tests with Jest and Vitest.
- AI-assisted development (Claude Code, Codex) and Claude Code rules and skills for the team.

Stack: Angular, TailwindCSS, TypeScript, Node.js, Express, Prisma, PostgreSQL, RabbitMQ, Docker, Jest, Vitest

Tracking and route optimization · September 2024 - January 2026

End-to-end development of a vehicle tracking, sequencing and route optimization application.

- Frontend with Angular, TypeScript, RxJS and SASS: geospatial map visualization and route planning based on orders and user-defined parameters.
- RESTful APIs and services with Node.js, adapting business rules and configurable parameters.
- Designed and documented data models; synchronization and migration from Firebase to SQL Server.
- SMS, WhatsApp and email notifications on system events with Twilio and NodeMailer.
- Refactored legacy components, improving performance, load times and usability based on Figma designs.

Plus+Ups | Full-Stack Developer

September 2022 - June 2024 · Full-time · Remote

Web and mobile application development for companies, in an agile team.

- Backend with Java, Spring Boot, Spring Security, Spring Data, Hibernate and Liquibase on MySQL and PostgreSQL.
- Modeled parametric and transactional entities, their relationships and CRUD screens.
- Frontend with Angular, TypeScript, RxJS and Bootstrap.
- PDF reports with JasperReports and Excel exports with Apache POI.
- iOS and Android mobile apps with NativeScript and OpenCV.
- Documented system architecture, fixed legacy bugs and technical debt, using Docker, Git and Scrum.

TECHNOLOGIES

Frontend: Angular, TypeScript, RxJS, React, Next.js, React Query, Zustand, HTML5, CSS3, SASS, TailwindCSS, Bootstrap, Angular Material, SSR, Responsive Design, React Native, NativeScript

Backend: Node.js, Express, Java, Spring Boot, Hibernate, REST APIs, JWT, Microservices, Prisma, Mongoose, RabbitMQ, Python, FastAPI, GraphQL, Kotlin

Databases: MySQL, PostgreSQL, SQL Server, MongoDB, Firebase, Liquibase

DevOps / Cloud: Docker, Docker Compose, AWS EC2, Nginx, Linux, Google Cloud Platform, Git, GitHub, CI/CD

Testing: Jest, Vitest, Jasmine, Karma, Mocha, Chai

AI & data: Claude Code, Codex, Cursor, Windsurf, RAG, memory, LangChain, FAISS, Hugging Face, tool calling, Machine Learning, NumPy

Methodologies: Scrum, Agile

Languages: Spanish (native) — English: conversational, technical reading, practice with native speakers

EDUCATION

EducacionIT | Javascript Fullstack Developer

February 2021 - November 2021

HTML, CSS, JavaScript, Node.js, Express, MongoDB, React, Angular.

Potrero Digital | Front-End Development

July 2020 - November 2020

HTML5, CSS3, Bootstrap and responsive design.

Esc. Cap. Daniel Manzotti | Electronics Technician, Telecommunications

2012 - 2017

Technical training in logic, problem solving and systems.

FEATURED CERTIFICATIONS

- Advanced Learning Algorithms · Supervised Machine Learning: Regression and Classification — DeepLearning.AI / Coursera, 2026
- Introduction to Python — EducacionIT, 2025
- Google Cloud Platform Fundamentals — EducacionIT, 2023
- Java Spring Boot · Java Standard 11 Web Programming · Advanced Android with Kotlin — EducacionIT, 2023
- Back End Development and APIs — freeCodeCamp, 2022
- Advanced Node.js Architecture · Angular 11 · Advanced React.js · Scrum Fundamentals — EducacionIT, 2021
