

AUGUSTO SORIA

Full-Stack Developer | Front-End | Back-End

augustosoria@hotmail.es | linkedin.com/augustosoria | github.com/augustosoria | augustosoria.github.io

PROFESSIONAL PROFILE

Software developer with 3+ years of experience in web and mobile development, working across both frontend and backend. Main stack: Angular, TypeScript, Node.js, Express, Java, Spring Boot, Docker. Experienced in RESTful API design, relational and NoSQL database modeling, and agile methodologies (Scrum). Strong knowledge of Next.js, React, React Query, and Zustand. Familiar with Google Cloud Platform, React Native, and GraphQL. Problem-solving mindset, committed to continuous learning and collaborative work.

PROFESSIONAL EXPERIENCE

kipBip | Full-Stack Developer

September 2024 - Present

End-to-end development of a vehicle tracking, sequencing, and route optimization application.

- Frontend: built interfaces with Angular, TypeScript, RxJS, HTML5, CSS3, and SASS, including geospatial map visualization and graphical data manipulation.
- Backend: implemented RESTful APIs and services with Node.js, adapting business rules and configurable parameters.
- Database: designed and documented data models; handled synchronization and migration from Firebase to SQL Server.
- Integrations: Twilio and NodeMailer for business event-driven notifications.
- Refactored legacy components, improving performance, load times, maintainability, and usability based on Figma design guidelines.
- Used AI-assisted tools (Claude Code, Codex) to speed up feature development, legacy component refactoring, and technical documentation generation.

Plus+Ups | Full-Stack Developer

September 2022 - June 2024

Web and mobile application development with a full-stack approach in an agile team.

- Frontend: developed interfaces with Angular, TypeScript, and RxJS.
- Backend: data architecture and modeling with Java, Spring Boot, Hibernate, and REST APIs.
- Database: MySQL, PostgreSQL, and Liquibase.
- Generated reports and files for business data export.
- Resolved legacy bugs and technical debt, improving overall system stability.
- Worked under Scrum methodology.

EDUCATION

EducacionIT | Full-Stack Development

February 2021 - November 2021

Training: HTML, CSS, JavaScript, Node.js, Express, MongoDB, React, Angular.

Potrero Digital | Front-End Development

July 2020 - November 2020

Specialization: HTML5, CSS3, Bootstrap, responsive design.

Esc. Cap. Daniel Manzotti | Electronics Technician

2012 - 2017

Technical training in logic, problem-solving, and systems.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, RxJS, React, React Query, Zustand, HTML5, CSS3, SASS, Next.js, SSR, Angular Material, Responsive Design, React Native (basic knowledge)

Backend: Node.js, Express, Java, Spring Boot, Hibernate, REST APIs, RESTful APIs, JWT, Microservices, Mongoose, Python, GraphQL (basic knowledge)

Databases: MySQL, PostgreSQL, MongoDB, SQL Server, Firebase, Liquibase

DevOps / Cloud: Docker, Compose, Google Cloud Platform, CI/CD (basic knowledge)

Methodologies: Scrum, Agile, Git, GitHub

Testing: Vitest, Mocha, Chai, Jasmine, Karma

Languages: Spanish (native) — English: conversational, technical reading, practice with native speakers

AI / Copilots: Claude Code, Codex, Windsurf, Cursor

AI / Integrations: Integration of AI models into projects, RAG, memory, fine-tuning, tool calling (working knowledge)
